Document status and date:

Published: 01/01/2015

DOI:

[10.26481/dis.20151120rb](https://doi.org/10.26481/dis.20151120rb)

Document Version:

Publisher's PDF, also known as Version of record

Please check the document version of this publication:

- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

Central venous catheters in hematological patients

Risky lifelines?

1. Een centraal veneuze katheter in hematologische patiënten die intensieve chemotherapie ondergaan is een "life line" (dit proefschrift)
2. Hematologen hebben geen andere keuze dan centrale veneuze katheters te "mishandelen" (dit proefschrift)
3. De incidentie van centraal veneuze kathetergerelateerde infecties bij patiënten met een acute leukemie die intensieve chemotherapie krijgen is veel hoger dan bij patiënten die een autologe stamceltransplantatie ondergaan (dit proefschrift)
4. Hematologische centra moeten een multidisciplinair CVC team hebben en dienen centraal veneuze kathetergerelateerde infecties en tromboses uniform te monitoren en centraal te registreren (dit proefschrift)
5. Lokale protocollen betreffende centraal veneuze katheters verschillen veel tussen hematologische centra (dit proefschrift)
6. Routinematig toedienen van systemische profylaxe om kathetergerelateerde tromboses te voorkomen dient niet plaats te vinden
7. Wat je niet kent, herken je niet
8. Hovon Echelon C ziekenhuizen dienen gewoon weesgeneesmiddelen (zoals bijvoorbeeld pomalidomide, ibrutinib en decetabine) te kunnen voorschrijven en vergoed te krijgen door de zorgverzekeraars
9. Pluk de dag...
